

 **CLOSING TODAY (29 Sep 2026):** Public subscription for SE Fruits ends today. Apply only via e-IPO (PSX / CDC). No paper forms at bank branches.

SE Fruits & Vegetable Ltd — Baby-Simple IPO Note

Fresh fruit exporter from Sargodha joins PSX. Same DividendFlow style as our Engro note — plain words, anime guides, no jargon fog.

Public window: 28–29 Sep 2026

Issue price PKR 40

Ticker path: SFVL / SE Fruits

Illustrative: Participate (size carefully)

Please read: Education only. Not a buy/sell order from DividendFlow.pk. IPOs can be oversubscribed (you may get fewer shares than you ask). Always read the official prospectus before applying.

STAGE 1 • WHAT IS AN IPO?

SE Fruits is “opening the shop door” to the public

ANIME GUIDE SAYS

“IPO = Initial Public Offering. The company sells new shares to people like you. Your money helps the company grow. You become a tiny owner.”

SE Fruits and Vegetable Limited (formerly Shaheen Enterprises) packs and exports **kinnow (oranges)**, **mangoes**, and is building a **potato** line. Home base: Bhalwal / Sargodha, Punjab — Pakistan’s citrus heartland. Export markets include Middle East, Far East, Central Asia, Russia belt, and more. It is described as **export-oriented** and **Shariah-compliant**.

Easy picture: A fruit-export factory needs cash to buy fruit from farmers, keep it cold, and ship it in refrigerated containers. The IPO is how they raise that cash from the stock market.

Almost 28 years old

Started 1998 as a partnership; became a company in 2025–26 for listing.

Public vs private

Before IPO = mostly private owners. After IPO = anyone can buy on PSX (once listed).

STAGE 2 • TODAY'S DEAL CARD

The offer in one glance (ending today)

ANIME GUIDE SAYS

"Big money already lined up in book-building. Now the last 25% is for the general public — that's the race ending today."

Item	Simple meaning	Number
Issue size	New shares for sale	30 million shares (~32% of company after IPO)
Strike / issue price	Price you pay	PKR 40 per share
Money raised (at PKR 40)	Cash into the company	~PKR 1.20 billion
Book-building (75%)	Institutions + HNIs first	22.5m shares · demand ~1.6× · strike fixed at 40
Public portion (25%)	Retail / general public	7.5 million shares · 28–29 Sep 2026
Minimum apply	Smallest ticket	500 shares = PKR 20,000 (then +500 lots)
How to apply	Only electronic	PSX e-IPO / CDC e-IPO (no physical bank forms)
Lead managers	Banks that run the IPO	Topline Securities + Growth Securities

Baby tip: 1.6× in book-building means more demand than shares at floor. That is interest — not a guarantee the stock will jump on listing day.

STAGE 3 · FOLLOW THE MONEY

Where does the PKR 1.2 bn go? + how big is the shop?

AI MARKET BUDDY SAYS

"I scan. You learn. Most of the cash buys inventory and working fuel — not fancy offices."

Use of IPO money (prospectus)

Use	Share	Approx PKR
Working capital (buy fruit, process, export)	78%	~940 m
Cold chain & processing expansion	13%	~154 m
UAE / Uzbekistan offices + reefer containers	4%	~50 m
ERP + asset tracking	3%	~30 m
Solar + grid	2%	~26 m

Recent shop scorecard (audited highlights)

Year	Net revenue	Profit after tax	Note
FY24	~PKR 1.43 bn	~PKR 173 m	Freight pain (Red Sea) hurt profit vs growth
FY25	~PKR 1.72 bn	~PKR 251 m	Kinnow quality hit by heat / late winter
FY26	~PKR 2.13 bn	~PKR 304 m	EPS ~4.77 · book value/share ~14.77 (pre-IPO base)

Price tag toy: At PKR 40 vs FY26 EPS ~4.77 → about **8×** earnings on the old share count. After IPO there are more shares (~94 m), so "same profit" would look closer to

~**12x**. Learning maths only — not a fair-value call.

Debt is basically **nil** in recent years — growth has been equity-funded. Nice for risk.
Working capital still eats cash every mango season (receivables / advances).

STAGE 4 · BOSS FIGHTS & FINAL TIP

Risks, checklist for today, and the simple call

ANIME GUIDE SAYS

"Fruit exports are real businesses — weather, freight, and foreign buyers can change the score overnight. Size your ticket like a snack, not your whole lunch."

Watch-outs

Weather / crop quality · freight & Red Sea style shocks · buyer concentration · seasonal cash squeeze · IPO allotment may be small if oversubscribed · listing price can go up or down

Nice-to-see

~28-year export track · revenue rising to PKR 2.1 bn · low debt · 1.6× book demand · cash mostly for working capital & cold chain · Shariah-compliant angle for some investors

Today's apply checklist (before window closes)

1. Open / use CDC account + bank that supports e-IPO.
2. Apply via **PSX e-IPO** or **CDC Centralized e-IPO** — electronic only.
3. Minimum **500 shares × PKR 40 = PKR 20,000**.
4. Keep cash ready; refunds come later if you get partial / no allotment.
5. Read the official prospectus PDF on PSX before you click submit.

Illustrative desk call: Participate (carefully)

In baby words: the story is a real fruit-export shop raising cash to buy more fruit and keep it cold. Book-building interest was decent at the floor. For a beginner, a

small, affordable application can be a learning ticket — not a “get rich today” bet. This is **education**, not an order to apply.

Ends today 29 Sep 2026

PKR 40 · min 500 shares

Track · Learn · Grow
